MAMMUT

Larzep proudly introduces the Mammut range of heavy duty air hydraulic jacks, European designed and manufactured to meet or exceed EN1492 standard. Designed especially for Australia's unique mining conditions, the range includes units with capacities of 30-150T, with two and three-stage telescopic lift: ideal for lifting heavy duty vehicles and machinery. High clearance and pneumatic tyres make Mammut jacks perfect for negotiating the most challenging terrain. The Mammut range is complemented by a full range of accessories, including a remote pendant to allow operation of the jack from a safe distance. Other accessories include load blocks which allow mechanical support of the lifted load, as well as extensions and holders.

Mammut features:

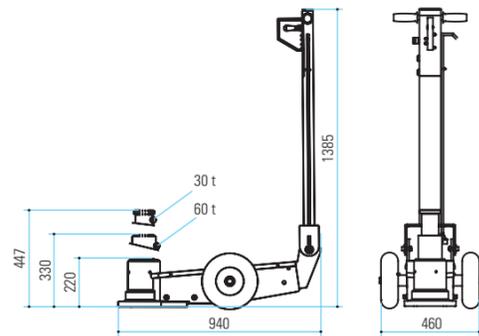

- Optional remote control for operator safety
- Full range of extensions are available
- Load support blocks available
- Internal pilot operated check valve
- Lifting eyes for easy handling and transport
